# code to parse data of ai output

Problem in node 'Code in JavaScript'  
Cannot read properties of undefined (reading 'parts') [line 1]

The screenshot shows the n8n interface with a workflow step. The 'Parameters' tab is selected. The 'Mode' dropdown is set to 'Run Once for All Items'. The 'Language' dropdown is set to 'JavaScript'. Below the language dropdown is a code editor with the following content:

```
1 return items.map(item => {
2   const parsed =
3     JSON.parse(item.json.candidates[0].content[0].parts.te
xt);
4   return { json: parsed };
}
```

A tooltip at the bottom of the code editor says: "Type \$ for a list of special vars/methods. Debug by using console.log() statements and viewing their output in the browser console." To the right of the code editor is an 'OUTPUT' panel showing an error message: "Cannot read properties of undefined (reading 'parts') [line 1] TypeError". Below the error message is a link to "n8n AI". Under the error message, there is a section titled "Error details" with a "Other info" button.
